DETAILED ACTION

This action is in response to amendments filed April 11, 2008.

Allowable Subject Matter

Claims 1-18, 20 and 21 are allowed.

The following is an examiner's statement of reasons for allowance: in independent claim 1, the limitations called for a single drive gear alternately engaging the gears of first and second pumps when a pump plate, on which both pumps are mounted, is in first and second positions respectively. The examiner had previously relied on teachings by Lopez et al., US Pat. No. 4,265,155, in combination with the multi-channel pump taught by Fried et al., US Pat. No. 3,816,033, to read on the invention. However, the examiner was persuaded by applicant's arguments that Lopez constituted non-analogous art (see *In re Oetiker*, 24USPQ2d 1443), and withdraws the rejections that relied on reference to Lopez. In this case, the limitations above are deemed to be nonobvious improvements to the prior art of Fried, enabling the motor to alternate between two pumps without the need to remove pump cassettes as required by Fried.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Beck et al., US Pat. No. 6,454,543 teaches a pump assembly comprising first 5 and second 3 pumps alternately engaged with a motor 2.
